

Program Course B.Tech CSE

Semester 2nd

Course code BCSCOE-101

Course Title Programming For Problem Solving

Assignment 01

Course Coordinator Dr. Shweta Rani

Note : Attempt All Questions.

Q.1 Write an algorithm, Pseudo code and Flow chart for finding
i) Smallest out of n numbers.

Q.2 What is an assignment statement? What is the relationship
between an assignment statement and an expression statement?

Q.3 Write a switch statement that will examine the value of an
integer variable called flag and print one of the following messages
depending on the value assigned to flag.

- (a) HOT, if flag has a value of 1.
- (b) LUKE WARM, if flag has a value of 2.
- (c) COLD, if flag has a value of 3.
- (d) OUT OF RANGE, if flag has any other value.

Q.4 What is the output of:

```
int i;  
for (i=0 ; i<=2 ; i++)  
{  
    switch (i)  
    {  
        case 1 : printf ("%d", i);  
        case 2 : printf ("%d", i);  
        default : printf ("%d", i);  
    }  
}
```

Q.5 How do expression statement differ from compound statement explain with
example.
